### **Televes**

# OPS3L Triple light source 3 wavelengths: 1310nm, 1490nm, and 1550nm

Three-wavelength generator (1310 nm, 1490 nm, 1550 nm) to measure the optical attenuation of an installation.

Ref.	2340	
Logical ref.	OSG3WL	
EAN13	8424450146002	

#### Packaging info

Box	1 pcs.
-----	--------

#### Physical data

Net weight	1,300.00 g
Gross weight	1,300.00 g
Width	97.00 mm
Height	205.00 mm
Depth	53.00 mm
Main product weight	435.00 g

#### Highlights

- Ergonomic, light-weight and robust
- LCD display
- Operation and keyboard LED
- Compatible with FC, SC, and ST APC connectors thanks to the integrated adapters

### **Televes**

- 12V power supply
- Equipped with a 1-m FC/APC SC/APC patch cord
- Equipped with a 1-m FC/APC FC/APC patch cord
- Cleaning buds included
- Option 234010 can be installed on request, allowing 3 lambdas to be generated simultaneously

## **Televes**

### Technical specifications

General			
Display		LCD 128 x 64 px	
Generated wavelength		nm	1310, 1490, 1550
Modulation		Hz	270, 1K, 2K
Tolerance		nm	± 20
Laser		Fabry Pérot	
Output power		dBm	-8 0 (1dBm steps)
Precision		dBm	0.25 (25°C ±3°)
Output connector			Adapter SC, FC and ST (APC)
Stability	Short-term (15min)	dB	< ±0,1
	Long-term (2h)	dB	< ±0,3
External units an	d batteries		
Battery			Li-lon 7.4 V
External power supply		V	12
Max. consumption		W	12
Autonomy		26 hours
